

# ALEXANDER MOISÉS MELÉNDEZ RÍOS

AI Agent Orchestrator & Intelligent Automation Specialist Lima, Peru | [Portfolio](#) | [LinkedIn](#) | [alexandermelendezrios@gmail.com](mailto:alexandermelendezrios@gmail.com) | +51 920438564

## PROFESSIONAL SUMMARY

---

AI Agent Orchestrator with a Professional Degree in Computer Science, specializing in the delivery of autonomous systems through agent orchestration and functional validation. Success in delivering **13 production-grade automation solutions** with verified ROI. Managed **\$399,565 USD in total business impact** (\$194k+ accumulated direct savings and \$205k+ in risk mitigation). Focused on orchestrating the software development lifecycle (SDLC) through agentic workflows to reduce delivery time for high-impact solutions.

## TECHNICAL SKILLS

---

- **Core Engineering:** SQL (Oracle) | RPA (Automation Anywhere A360 - Master) | API Integration (REST, Graph API) | Process Design (PDD/SDD) | .NET
- **Agentic & Cloud:** AI-Assisted Engineering (OpenAI API, LLM Orchestration) | Python (AI-assisted scripting) | Azure DevOps | CI/CD | GCP Cloud Run

## PROFESSIONAL EXPERIENCE

---

### PROMART HOME CENTERS

AI Automation Specialist | July 2024 – Present

- **Delivered 9 production-grade automation solutions** (out of 17 designed flows), freeing a total of **3,958+ man-hours/month** across the operation.
- **Automated treasury reconciliations and payment reversal workflows** (JSatellite/IRS + Izipay API), cutting the operations team from **38 to 3 supervisors**.
- **Orchestrated the integration of the OpenAI API** with A360 to autonomously generate web content and SEO data, eliminating manual copywriting workflows.
- **Delivered a Cloud-Native PO generation system** (GCP Cloud Run, .NET) using Azure DevOps CI/CD, achieving a 2.5-week time-to-market.
- **Replaced UI-based data extraction with direct Oracle DB queries** across multiple bots, eliminating interface failure points.
- **Mitigated \$205,175 USD in financial and regulatory risk** (SUNAFIL & Promotions) by systematizing labor law controls and preventing manual configuration errors.

### GLOBAL HITSS

RPA Automation Consultant | April 2023 – June 2024

- **Developed 4 high-volume transactional automation processes** for Claro Peru in Automation Anywhere (A360), enabling mass activation and deactivation of cloud storage plans for a high-volume consumer segment.
- **Designed resilient bot architectures** featuring dynamic retry mechanisms and advanced exception handling, ensuring stability in unstable legacy environments with multiple failure points.
- **Produced full technical documentation** (PDD/SDD) for each process, leading Process Discovery sessions directly with end-users to translate business requirements into executable technical specifications.

### SOAPROS

## Fullstack Developer | May 2022 – December 2022

- **Engineered a document tracking system** for Movistar using **Node.js** and **TypeScript** within a strict Agile/Scrum framework.
- **Ensured 100% regulatory compliance** with the national tax authority (SUNAT) by developing electronic invoicing modules using Hapi.js and SQL architectures.

## PERSONAL PROJECTS

---

**CobroApp** — Installment Sales Management SaaS (*Personal · Vibecoding-orchestrated*)

- Built and deployed a full-stack cloud-native app: **React 18 + Node.js + PostgreSQL (Neon serverless)** on **Cloudflare Pages** (frontend) and **GCP Cloud Run** (backend).
- Configured **Google Cloud Build** CI/CD pipeline for zero-touch deploys on push to main and **GitHub Actions** for automated daily PostgreSQL backups (30-day retention).
- Implemented **JWT auth** with access/refresh token rotation and a concurrent-request queue during token refresh to prevent race conditions.

## EDUCATION & CERTIFICATIONS

---

- **Professional Degree (Licensed) in Computer Science** – Universidad Peruana de Ciencias Aplicadas (UPC), 2023.
- **Automation Anywhere Certified Master RPA Professional (A360)**.

## LANGUAGES

---

- **English:** Professional Working Proficiency.
- **Spanish:** Native.
