

ALEXANDER MOISÉS MELÉNDEZ RÍOS

AI Automation Engineer | Python 3.12, APIs, .NET and GCP

Lima, Peru | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | alexandermelendezrios@gmail.com | +51 920 438 564

PROFILE

Computer Science graduate with over four years of experience in software and automation for retail, telecommunications, and administrative systems. I have deployed services and jobs using **Python 3.12, .NET, OpenAI API, Gemini Vision, and GCP Cloud Run**, integrated with Oracle, SQL Server, PostgreSQL, and Microsoft Graph. At PROMART, I put a promotions rules engine into production that cut a daily batch from **3 hours to 2 minutes**. My consolidated record includes **13 delivered automations, \$399,565 USD in managed business impact, and 3,958+ hours/month released**. I use AI agents to accelerate software delivery and documentation, then validate their output against business rules, code, and live operations.

TECHNOLOGIES

- **Applied AI:** OpenAI Responses API, Gemini Vision, prompt design, structured output, parsing and validation, retries, and model fallback.
- **Software:** Python 3.12, FastAPI, Playwright, .NET 10, Node.js, TypeScript, Next.js, React, and REST APIs.
- **Cloud and data:** GCP Cloud Run services/jobs, Pub/Sub, GCS, Secret Manager, Docker, Azure DevOps CI/CD, GitHub Actions, Oracle, SQL Server, and PostgreSQL.
- **Integrations and automation:** Microsoft Graph, SharePoint, Outlook, Automation Anywhere A360 (Master), Power Automate, PDD/SDD, logs, exception handling, and human review.

EXPERIENCE

PROMART HOME CENTERS

RPA Automation Specialist | *July 2024 - Present*

- Built and deployed a **promotions portal and rules engine** using .NET 10, Cloud Run, Pub/Sub, and GCS; cut a daily batch from **3 hours to 2 minutes** and handles up to **10 files / 5,000 rows** with Oracle and SQL Server checks, traceability, and human review of exceptions.
- Migrated **Web Descriptions** from Automation Anywhere to a **Python 3.12 Cloud Run Job** that downloads Excel from SharePoint, processes SKUs concurrently with OpenAI API, validates workbook/HTML output, uploads results, and sends notifications through Microsoft Graph.
- Migrated **CIP Lookup** to a FastAPI service using Playwright and **Gemini Vision** for captcha resolution; added Pydantic validation, API-key protection, concurrency limits, retries, model fallback, and Azure DevOps deployment.
- Delivered a .NET purchase-order job on GCP Cloud Run in **2.5 weeks**, with CI/CD and Microsoft Graph integration.
- Automated treasury reconciliation across JSatellite, BackOffice, and IRS; operations moved from **38 treasury staff to 3 supervisors**.
- Integrated OpenAI API through REST actions in A360 for web descriptions and SEO, and replaced UI extraction with direct Oracle queries.
- Documented **17 flows** in PDD/SDD format, with 9 live at the ROI cutoff; PROMART's consolidated record reports **\$194,390 USD in direct savings** and **\$205,175 USD in mitigated risk**.

GLOBAL HITSS | CLARO PERU

RPA Automation Consultant | April 2023 - June 2024

- Developed four Automation Anywhere A360 automations to activate and deactivate cloud storage plans for consumer accounts.
- Implemented retry and exception-handling patterns for workflows running against legacy interfaces.
- Gathered requirements with users and wrote PDD/SDD documents to convert operational rules into executable workflows.

SOAPROS | MOVISTAR

Software Developer | May 2022 - December 2022

- Developed a document-tracking system with Node.js and TypeScript using Scrum, Git branches, and pull requests.
- Built reporting and invoicing modules linked to SUNAT requirements using Hapi.js, Vue.js, and SQL.

ADDITIONAL EXPERIENCE

- **MOVITECH - Software Developer** | March-July 2022: entity-relationship models and billing modules using Hapi.js, Vue.js, and SQL.
- **SUNAT - Programmer Analyst Intern** | March-December 2021: VBA macros and statistical reports for institutional data.

OWN PRODUCTS

- **JOHALEX:** Cloud Run hotel operations system for six rooms, covering roles, stays, partial payments, cleaning, inventory, and audit history. Next.js, TypeScript, PostgreSQL/Neon, and Drizzle.
- **CobroApp:** deployed installment-sales, collections, inventory, and finance application on Cloudflare Pages, Cloud Run, and Neon; JWT/refresh tokens, payment-derived states, and daily backups.

EDUCATION AND CERTIFICATIONS

- **Professional Degree in Computer Science** - Universidad Peruana de Ciencias Aplicadas (UPC), 2023.
- **Automation Anywhere Certified Master RPA Professional**, November 2024.
- Advanced Automation Certification, October 2024 | Essentials Automation Certification, September 2024.

LANGUAGES

Spanish: native | **English:** professional working proficiency; two Work and Travel seasons in Colorado, USA.
