

ALEXANDER MOISÉS MELÉNDEZ RÍOS

AI Automation Engineer

Lima, Peru | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | alexandermelendezrios@gmail.com | +51 920 438 564

PROFILE

Computer Science graduate with over four years of experience automating processes for retail and telecommunications. I specialize in Automation Anywhere A360. I have experience gathering requirements, defining business rules, and taking automations into production. In recent projects, I have also used AI-assisted development to build applications and services.

SKILLS AND TOOLS

- **Automation:** Automation Anywhere A360 (advanced), Master certification, requirements gathering, business rules, PDD/SDD, exception handling, and production support.
- **AI-assisted development:** Codex, Claude Code, and Antigravity.
- **Software and cloud used with AI assistance:** Python, .NET, JavaScript, TypeScript, React, Node.js, GCP Cloud Run, and Docker.
- **Data and integrations used in projects:** Oracle, SQL Server, PostgreSQL, Microsoft Graph, SharePoint, and REST APIs.
- **AI integrated into specific projects:** OpenAI API.

EXPERIENCE

PROMART HOME CENTERS

RPA Automation Specialist | *July 2024 - Present*

- Defined and validated the rules for a promotions portal that went into production and reduced daily processing from **3 hours to 2 minutes**.
- Documented 17 flows in PDD/SDD format. Consolidated measurement across 9 production automations recorded \$194,390 USD in direct savings and \$205,175 USD in mitigated risk.
- Replaced an Automation Anywhere automation that generated product names, descriptions, and HTML with a workflow on GCP Cloud Run. The new workflow uses OpenAI API and publishes the results to SharePoint.
- Automated daily treasury reconciliation. The process went from requiring the involvement of 38 treasury staff to being supervised by 3 people.
- Implemented access control in the backend and frontend of an internal portal for managing price changes. Permissions restrict the functions and data available based on each user's profile and area.

GLOBAL HITSS | CLARO PERU

RPA Automation Consultant | *April 2023 - June 2024*

- Developed four Automation Anywhere A360 automations for Claro Peru processes. One of them automated high-volume activation and deactivation of cloud storage plans. Added retries and exception handling for operation across legacy systems.
- Gathered requirements from users and documented the business rules for each automation in PDD/SDD format.

MOVITECH | PROJECT FOR SOAPROS / MOVISTAR

Software Developer | *March 2022 - December 2022*

- Developed a document-tracking system for Movistar using Node.js and TypeScript.
- Built reporting and invoicing modules aligned with SUNAT requirements using Hapi.js, Vue.js, and SQL.

ADDITIONAL EXPERIENCE

- **SUNAT | Programmer Analyst Intern** | *March 2021 - December 2021*. Maintained VBA macros to search and process institutional data and produced statistical reports.

OWN PRODUCTS

- **JOHALEX:** Created a production system for running a six-room hotel. It includes reservations, stays, payments, cleaning, cash management, and inventory.
- Created a production application to manage installment sales, collections, and inventory. It updates balances and statuses from recorded payments and allows each payment received to be included in income, expense, and budget tracking without duplication.

EDUCATION AND CERTIFICATIONS

- **Professional Degree in Computer Science** - Universidad Peruana de Ciencias Aplicadas (UPC), 2023.
- **Automation Anywhere Certified Master RPA Professional**, November 2024.
- Advanced Automation Certification, October 2024 | Essentials Automation Certification, September 2024.

LANGUAGES

Spanish: native | **English:** professional working proficiency; two Work and Travel seasons in Colorado, USA.
